

Seating for Hospitals and Care Environments 2023

About Us

Our aim is to enhance the lives of those in need of specialist care by providing advanced products, with class-leading service and support. We have been supporting healthcare professionals in the NHS, private sector and local authorities for over 50 years.

Some of the Trusts That Depend on Us

Black Country Healthcare NHSFT

Derbyshire Community NHSFT

Mid Cheshire Hospitals NHSFT

Cambridge University Hospitals NHSFT

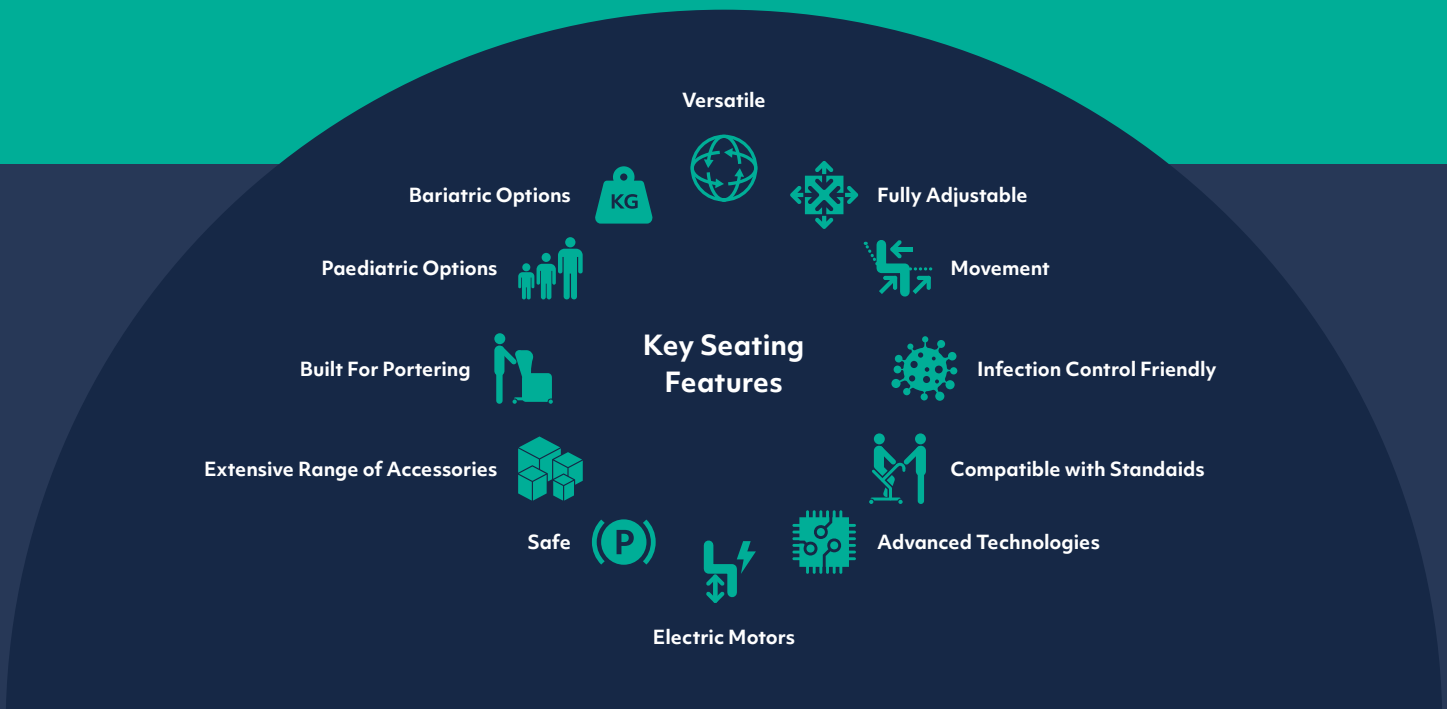

Essex Partnership University NHSFT

Northern Care Alliance

We are committed to working with our partners to identify and develop seating that can take patient care forward, provide improved outcomes and enhance lives.

How We Help

-  Rehabilitation seating available for immediate deployment into secondary care to relieve hospital bed capacity
-  Flexible seating systems to accommodate all patient needs
-  Specialist seating designed for specific medical treatments
-  Modularity and functionality are at the heart of our seating innovations
-  Audits, staff training and servicing are just some of the ancillary services we provide

Our Acute Seating Range

Browse our full range of seating for hospital and acute care settings, including our latest innovations for mammography and dialysis treatment delivery.

About This Chair

The Lento Neuro.

A Cocooning Chair for Patients With Neurological Conditions

The stability, comfort and “cocoon” nature of the Lento Neuro makes it the perfect option for patients with neurological conditions, particularly those causing involuntary movement (such as Huntington’s Disease, and Parkinson’s Disease).

We have spent years developing this chair, to be a seating solution that will “hug” patients while providing comfort, safety, and stability. The solid steel frame can withstand strong use and movement for extended periods of time, & the soft but durable Ultima & Dartex fabrics work with the viscose foam or cool-gel cushions to maximise comfort, whilst also offering colour options.

Versatile

Adjusts to Fit Most Patients with Neurological Conditions

Adjustable

Width, Depth and Backrest Adjustability

Safe User Weight

150 kg (23.6 st)

Infection Control

Removable Cushions and Backrests, & Optional Magnet Fastenings

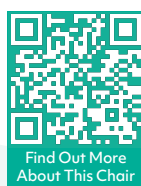

Movement

Backrest Angle, and Incremental Seat Recline

Safe & Stable

Solid Steel Frame with 4 Braked Castors for Maximum Stability

Find Out More About This Chair

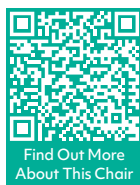

Tried & Tested

This chair was developed with help from experienced neurologists, carers, and occupational therapists from VIDA Healthcare, the Huntington's Disease Association, and Inspire Neurocare.

5 Year Frame Warranty

“This new chair is an exciting addition to the market, as it can be adjusted to meet the complex needs of so many different patients with neurological conditions, and at all stages of their condition”

Get in touch to request a quote, or to arrange a free seating assessment from one of our care experts.

Seating Standardisation

What is Seating Standardisation?

Seating standardisation is a relatively new concept in hospitals that incorporates all desirable seating benefits into a standard range of chairs.

A key factor is the level of adjustability and modularity that is built into our own chairs. Each chair can be adjusted to fit the patient, and all parts are standardised and fully interchangeable to keep your chairs in use 24/7.

We have worked in collaboration with various hospital trusts when designing our chairs, to truly understand the pain-points faced and how our chairs can be designed to overcome these issues.

Our 8 Step Seating Standardisation Process

Note: This process is Vivid.Care's usual procedure when carrying out a seating standardisation project. However, every organisation has different needs and wishes, and we can tailor our approach to fit.

Benefits of Seating Standardisation

Benefits for Patient:

- Fully adjustable sizing
- Patient-centred with multiple care features built into the chair
- Options and accessories available to suit different conditions

Benefits for Staff:

- Designed for single-user operation and to assist delivery of care
- Versatile between different care environments and patients
- Easily adjustable and modular parts

Benefits for Hospital Trust:

- Streamlines the procurement process
- Strong UK-based supply chain
- Cost efficiencies

Seating Collaborations

Designed the Lento Mobile Rise & Recline chair in collaboration to reduce transfers and manual handling risks to staff.

Piloted the 40 stone bariatric chair to accommodate a wider range of bariatric patients. *"Staff have access to appropriate chair for patient as soon as they arrive on the ward".*

Working alongside the Neuro Rehab team to equip them with an effective rehabilitation seating plan to help commission the state-of-the-art Trauma Assessment Unit (TAU). *"The seating range is vast and the team have been very responsive and helpful throughout the process".*

Digitalisation in Healthcare

There are many new innovations being piloted in the healthcare system that harness technology to increase clinical effectiveness.

Some of the schemes we are supporting and helping to develop include:

- Virtual Wards
- Digital Patient Portals
- Equipment Location Tracking

Infection Control

Our chairs have a range of built-in features to meet rigorous infection control standards.

- Magnetic cushions (no Velcro)
- Smooth flat wipe-clean surfaces, no seams or recesses
- Removeable zipped seat and cushion covers

We are also researching new infection control technologies that can revolutionise current seating practices.

Tissue Viability

Official figures report that wound care and pressure ulcers cost the NHS £8.3bn in 2017/18.

We want to help reduce the scale of this problem by developing new technologies in our chairs. We are currently working with Huddersfield University on a research project in this area.

Condition-Specific Products

Some of the chairs in the VELA range are designed to deliver particular treatments and radiology procedures.

Our range of seating options and accessories are designed to assist particular medical conditions, see our seating accessories e-book for more information.

Our Resources

We have a large bank of resources to help clinical staff, therapists and procurement teams. Visit our website and browse by subject to find the resources that are appropriate for you.

Don't forget to follow our blog (www.vivid.care/blog) and catch up on the latest insights in the healthcare world.

Why Partner With Us?

Partnering with Vivid.Care entitles you to a range of benefits that support the best possible outcome for your patients. We will enable you to reduce the demands on your staff, increase bed numbers at your site, relieve ward pressures and deliver real value for your seating investment from purchase to aftercare.

Service Contracts

Our team of qualified engineers support our partners across the UK and will ensure that your equipment stays in optimum condition. Various packages can be tailored to suit.

Delivery

Product delivery on any stock item is just 2-4 days. Our specialist seating products are delivered by our own courier team. If you cannot accommodate a bulk order in full, we offer bulk storage at regional UK hubs, storing your equipment locally until you are ready to take delivery.

Training

We offer free training on a 1-2-1, train-the-trainer or group basis. We are an accredited CPD provider and have developed two CPD courses that are available free of charge to groups of 10 or more healthcare professionals.

Group Backing

We are part of the CoreCare Group of companies that includes logistics and storage specialists, project management expertise and design services. With strong financial backing and extra resources available you can be confident you are in safe hands.

Funding

Our experience in partnering with the NHS and Local Authorities gives us a sound understanding of funding challenges and nuances. As a partner, we would share our expertise and support for your funding initiatives including supporting documents wherever appropriate.

Audits

When standardising your seating or specialist equipment needs, an audit of legacy inventory is often the best place to start. We all know that audits are a time-consuming process. We are ready to support. Consider deploying our experienced team to your process. We can ensure accurate reporting and conclusions that enable sound decision-making.

Product Innovation

We develop class-leading innovative products that take the solution to complex cases and existing healthcare challenges to the next level. We give product briefings and conduct regular feedback and Q&A sessions. Our work with healthcare professionals help to inform our next generation of products providing enhanced outcomes for professionals and those in need of care.

Sustainability

We are mindful of our responsibility as a responsible corporate citizen to make a positive difference to the world around us and provide for future generations. As part of this commitment, one of our strategic objectives is to become carbon-neutral by 2035 by implementing sustainable practices in operational processes and product design.
